

Wayfinding improvements

These projects are part of the operational budget and have been endorsed by council following previous community consultation but have not been constructed.

What is 'wayfinding?'

Wayfinding is installed to support pedestrians and bicyclists to find their way to and from destinations using signs or line marking on the pavements or along the route.

These projects are considered low cost and easy installations causing minimal disruption.

Hurstbridge Line Shimmy	Northcote	Wayfinding improvement at rail bridge on Westgarth St
